Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 24, 25, 27 and 29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hanson (5685711) in view of Voudouris (5913680). Hanson shows a device body 36, Figs. 8-10, pivot member 64, shutter member having a pivot portion 58, a slot closure portion 56 and an attitude control spring 54. Hanson shows locating the attitude control spring 54 at the end of the shutter member 56 that is closest to the pivot portion, however, does not show locating the attitude control spring at the end portion further from the pivot portion. Voudouris teaches a shutter 30 that pivots about end 30A, Fig. 2B, and has an attitude control spring 36 located at the end further from the pivot portion. It would be obvious to one of ordinary skill in the art to modify Hanson to include locating the attitude control spring as shown by Voudouris in order to make use of art known locations for similar elements to best contain the archwire.

Claim Objections

Claim 25 is objected to because after "slot" in line 4, the claim continues on the next page repeating text.

Allowable Subject Matter

Claims 26, 28 and 30 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments filed February 21, 2006 have been fully considered but they are not persuasive. Applicant's remarks are held to be moot in view of the newly applied rejections and indication of allowable subject matter above.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
